SUMMARY

Senior Mobile Engineer with 5+ years building production React Native apps across fintech, CRM, and IoT. Specialized in React Native, TypeScript, and the Expo/EAS ecosystem, with deep expertise in offline-first architectures, E2E testing, and CI/CD. Known for tackling problems other teams deferred and closing quality gaps proactively, such as introducing Maestro E2E testing into a codebase that had needed it for years. Measurable impact across roles: 90% fewer support tickets, 40% fewer regressions, 70% faster deployments.

SKILLS

Proficient:

React Native, TypeScript, JavaScript, Swift, Kotlin, Redux, Zustand, React Query, Expo, Tailwind, CSS3, Jest

Intermediate:

AWS, Fabric, TurboModules, React Compiler, UJET, Google Cloud CCAI, Customer.io, Figma

EXPERIENCE

React Native Engineer - Full time

Collective Health | 01/2026 – 06/2026

App: Collective Health - [App Store](#) · [Google Play](#)

- Built the mobile E2E testing program from scratch with Maestro and a custom Node mock server, shipping reusable subflows and scenario-driven fixtures that unlocked automated regression coverage across critical member journeys on iOS and Android.
- Led the React Native 0.83.1 upgrade stabilization, eliminating hundreds of type and hook-rule violations to unblock Fabric, TurboModules, and React Compiler readiness across the codebase.
- Owned the chat and notifications experience end-to-end with UJET (Google Cloud CCAI), Customer.io, and Firebase Messaging, restoring the primary CRM activation path on iOS through SDK upgrades and cold-boot deep-link reliability fixes.
- Resolved production crashes and Android 15+ edge-to-edge contract issues in React Native, Kotlin, and Gradle, measurably reducing Play Console reported user impact.
- Expanded AI-powered claim search across Medical, Dental, and Vision while delivering i18n, accessibility, and design-system parity improvements across high-traffic screens.

Key Technologies and Tools: React Native, TypeScript, Zustand, Maestro, TurboModules, Swift, Kotlin, Sentry, Amplitude, Firebase, Apple Wallet, UJET, Fabric, React Compiler

Mobile Developer - Full time

Ploomes | 05/2023 – 01/2026

App: Ploomes CRM - [App Store](#) · [Google Play](#)

- Engineered a robust offline architecture using RealmDB and OData, reducing support tickets by 90% and ensuring reliable synchronization in low-connectivity environments.
- Enhanced core UI/UX flows with React Native, Reanimated and Gesture Handler, delivering intuitive CRUD, chart, and map experiences that increased user engagement and data clarity.
- Developed an offline-cached universal search with TypeScript and Redux, supporting 30+ daily queries per user and improving accessibility for 5,000+ active users.
- Spearheaded an automated testing pipeline with Jest (unit) and Maestro (E2E), cutting regression incidents by 40% and improving release confidence across teams.
- Streamlined CI/CD workflows using Bitrise, CodePush (OTA updates), and GitHub Actions, reducing manual deployment time by 70% and ensuring consistent store releases.
- Optimized legacy navigation and data modules in React Native and TypeScript, improving scalability, maintainability, and delivery speed across squads.

Key Technologies and Tools: React Native, TypeScript, Redux, Jest, Swift, Kotlin, CodePush, Bitrise, Zustand

Mobile Developer - Full time

Agrolite | 01/2021 – 05/2023

App: Agrolite Gestor - [App Store](#) · [Google Play](#)

- Engineered an offline-first architecture for the Farm Operations App (Kotlin), enabling full offline functionality and seamless data synchronization.
- Integrated Bluetooth and WebSocket communication through custom Native Modules, enabling real-time connectivity and control of proprietary farm hardware.
- Modernized the Farm Management App in React Native, redesigning the home dashboard with charts, goal tracking, and camera grid views, increasing app usage by 22%.
- Delivered UI/UX improvements using React Navigation, Reanimated, and Gesture Handler, enhancing both standard navigation and form screens and complex interfaces such as camera grids and interactive charts.
- Implemented Firebase Crashlytics and Firebase Analytics, improving error visibility and performance monitoring.
- Refactored legacy modules in Kotlin and React Native, reducing runtime failures and improving delivery speed across teams.

Key Technologies and Tools: React Native, Kotlin, TypeScript, Reanimated, React Navigation, Firebase, AWS

Mobile Developer - Part time

Freelance | 06/2020 – 01/2021

- Developed mobile applications for small companies and early-stage startups, turning product concepts into market-ready solutions with React Native and TypeScript, aligned with each client's business goals.
- Collaborated with founders and designers to architect scalable app structures and deliver MVPs and production releases optimized for performance, usability, and maintainability.
- Implemented continuous delivery using CodePush (OTA updates) and store publishing pipelines, managing the full release lifecycle from build to deployment across App Store and Play Store.
- Delivered multiple client apps that improved product launch speed and user experience, spanning UI-driven prototypes to full-scale production systems.

Key Technologies and Tools: React Native, TypeScript, Expo, Redux, CodePush

Mobile Developer - Part time

Fintech Freelance | 03/2026 – Present

App: Pluma Finance - [App Store](#)

- Shipped a personal-finance iOS app from zero to production with React Native + Expo, driven end-to-end through an agentic AI workflow (Claude Code).
- Implemented Supabase auth (PKCE, TOTP 2FA) and Open Finance integration via Pluggy, backed by a network-aware tRPC + TanStack Query data layer.
- Delivered a modern UI with native iOS Liquid Glass and Reanimated animations, RevenueCat subscriptions, and Sentry monitoring, with a full EAS Build + EAS Update (OTA) pipeline on GitHub Actions, tested with Jest and Maestro.

Key Technologies and Tools: React Native, Expo, RevenueCat, Supabase, Claude, Sentry, Maestro, Jest, GitHub Actions, EAS

PROJECTS

Daily Logs - Workout Tracker - Personal project

01/2025 – Present | App Store: in review

- Built and submitted to the App Store (currently in review) an offline-first workout-tracking app from zero with React Native, React 19 with the React Compiler and the New Architecture enabled, driven end-to-end through an agentic AI workflow (Claude Code).
- Architected a fully offline local data layer with expo-SQLite + Drizzle ORM, designing a three-tier schema (catalog, template, session) with soft deletes, UUID keys, and idempotent versioned seed packs (128+ exercise catalog), exposed through a clean repository pattern.
- Engineered live workout state on iOS with a custom native Swift module for Live Activities / Dynamic Island and a WidgetKit workout widget (@bacons/apple-targets), persisting rest-timer, current-exercise, and resume-session state across cold boots.
- Crafted a native-feel UI with iOS Liquid Glass (expo-glass-effect), Reanimated 4 animations, NativeWind 4 + Tailwind, haptics, and react-i18next localization across 3 languages (EN/PT/ES).
- Managed state and forms with Zustand, TanStack Query, and React Hook Form + Zod, including active-session resume, in-execution structure editing, and previous-set comparison for progressive overload.
- Automated the full release lifecycle with GitHub Actions: lint + Jest gates, automatic semantic version bumping, and EAS Build + EAS Update (OTA) across development/preview/production channels, with Maestro E2E flows covering critical journeys.
- Drove the complete release process to store submission, production EAS Build, code signing, App Store Connect metadata, and TestFlight distribution, with the app currently under App Store review ahead of public launch.

Key Technologies and Tools: React Native, Expo, EAS, TypeScript, Drizzle ORM, expo-SQLite, Swift (Live Activities/WidgetKit), Zustand, TanStack Query, React Hook Form, Zod, Reanimated, NativeWind, Jest, Maestro, GitHub Actions, Claude, Tailwind

EDUCATION

Bachelor's - Computer Science

University of Fortaleza (Unifor) | 2025

CERTIFICATIONS

English Course Certificate (C1)

Fisk - Richard Hugh Fisk Foundation | 2018

LANGUAGES

Portuguese (Native), English (Advanced), Spanish (Intermediate)
